

Quick Start Guide

Vodafone 3G Broadband Modem

Designed
for Vodafone

vodafone

Welcome to your new Vodafone
3G Broadband Modem, designed
for 3G and 3G Broadband.

We'll now take you through the
simple process of setting it up,
and help you get started – **so you
can make the most of now.**

- What can I do with it? ②
- Set up your modem ③
- Run the software ④
- Internet ⑤
- SMS ⑥
- Contacts ⑦
- Troubleshooting ⑧

What can I **do** with it?

Your Vodafone 3G Broadband Modem will let you connect your laptop or desktop computer over the Vodafone high-speed mobile network, so you can **browse the web** and **send and receive emails**.

Browse the web

You can now access the web wherever you are (as long as there's a data signal) – and at 3G or 3G Broadband speeds.

This means that you only need your laptop or desktop computer and your Vodafone 3G Broadband Modem to have all the information and services on the internet in front of you.

Pick up emails

Keep up to date with your emails, wherever you are. Sending and receiving large attachments is no problem, thanks to 3G and 3G Broadband speeds.

What is 3G Broadband?

3G Broadband is another name for High-Speed Downlink Packet Access (HSDPA). This allows up to four times faster data speeds than 3G, and should make downloading data and browsing the web even faster than before.

Please note:

- If 3G or 3G Broadband is not available, the GPRS network will be used instead.
- The Vodafone 3G and 3G Broadband network is growing all the time.

Set up your modem

Before you can start using your new modem, you'll need to set it up.

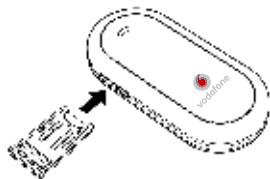

You will need to have an activated Vodafone SIM card – this should have been provided when the modem was purchased.

- Remove the SIM card holder from the side of the modem. Slide the SIM card in as shown, making sure it's firmly in place.
- Put the SIM card holder back into the side of the modem.

You should have been supplied with two data cables – one short and single-ended, and one long and double-ended. You only need to use the double-ended cable if a single one of your USB ports does not supply enough power (e.g. if it's a self-powered USB hub).

- Plug the single end of the data cable into the modem as shown.
- Plug the other end into your computer's USB port – if this does not power the modem, then use the double-ended cable.

This should automatically start the software – see next page.

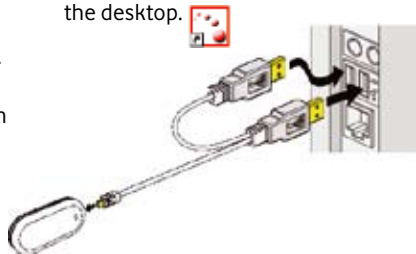

Run the software

- 1) Connect the Vodafone 3G Broadband Modem to a laptop or desktop computer.
- 2) The installation program will start automatically. If, for some reason, the installation does not start after a few minutes, (e.g. your computer may have the Autoplay function disabled) then using Windows Explorer, navigate to "My Computer". The Vodafone 3G Broadband Modem is identified as a removable drive with a "Vodafone" icon beside it. Click on this drive, then double click on the item titled "Autorun".

- 3) Install the program according to the prompts on the screen.

Note: Do not unplug the modem in the installation process.

- 4) After successful installation, a shortcut icon for the Vodafone 3G Broadband modem appears on the desktop.

Introduction to the Vodafone 3G Broadband Modem

1. Accessing the Vodafone 3G Broadband Modem

Double-click  on the desktop to start the Vodafone 3G Broadband Modem software.

The system will prompt you to enter a PIN. This is the 4-digit SIM PIN number which is located on the SIM envelope.

2. Introduction to the Icons

Connect/Disconnect the network connection:

Open Internet Explorer (IE):

Access the SMS window:

Access the Contacts window:

Internet

Connecting to the internet

- 1) Click  to connect to the network.
- 2) When the connection is created, the current connection information will be displayed on the right pane of the window, including connect duration, data volumes, received and sent volumes, rate and the top rate.
- 3) Click  to open Internet Explorer, and access the Internet.
- 4) Click  when you want to disconnect the network connection.

Removing the Vodafone 3G Broadband Modem

To remove the Vodafone 3G Broadband Modem, you need to:

- 1) Double-click  on the status area of the desktop; the "Safely Remove Hardware" prompt will be displayed.
- 2) Click on "Huawei Mass Storage USB Device" and then click "Stop".
- 3) At the prompt, the modem can be removed safely.

SMS

1. Creating an SMS

- 1) Click  to access the SMS window.
- 2) Click **Write**.
- 3) Enter one or more telephone numbers and write your text message.
- 4) Click **Send**.

Note: While entering telephone numbers, you can click **Contacts** to search for and add numbers.

2. Viewing an SMS

You can select **Settings > Options > SMS Alerts** to set the prompt methods for a new message. You can select **Alert tone** or **Alert window**.

If **Alert tone** is selected, when there is a new message, you will hear a prompt.

- 1) Click  to access the SMS window.
- 2) Click **Inbox** to view the messages.

If **Alert window** is selected, when a new message arrives, a prompts window will be displayed.

Click **View** to view the message or click **Close** to view it later.

3. SMS Settings

Select **Settings > SMS Settings** for the following settings:

- **Reports:** to set whether to ask for a delivery report.
- **Validity:** to set the valid period during which messages can be stored in the SMS centre.
- **Message Centre Number:** Vodafone 3G Broadband Modem will auto read the number pre-set in the SIM card. If this does not happen, please enter the message centre number in the following format +35387699989.

Standard text message charges apply.

Contacts

1. Creating a New Contact

- 1) Click  to access the Contacts window.
- 2) Click **New**.
- 3) Enter the name, telephone number, email address and comments. Then click **Save**.

2. Modifying Contacts

- 1) Click  to access the Contacts window.
- 2) Select a contact to modify and then double-click it or click **Edit**.
- 3) After the modification, click **Save**.

3. Deleting Contacts

- 1) Click  to access the Contacts window.
- 2) Select one or more contacts and then click **Delete**.
- 3) At the prompt, click **OK**.

4. Sending an SMS to a Contact

- 1) Click  to access the Contacts window.
- 2) Select one or more contacts and then click **Send**.
- 3) In the pop-up window, select the telephone numbers you want to send a message to and then select **OK**. The program will jump to the window for creating a message.
- 4) The selected contact numbers will be displayed in the blank column of Contacts. Enter the contents of the message and then click **Send**.

5. Searching for a Contact

- 1) Click **Search**.
 - Select the search range in the **Field** drop-down box.
 - Enter the search conditions in the **Value** text box.
 - Select the matching type, such as "Match Whole Word Only" and/or "Match Case".
- 2) Click **Search Now** to begin searching.
- 3) Click **Stop Search** to stop searching.

Troubleshooting

- If nothing happens when you plug the modem into your laptop or desktop computer, try using another USB port.
- If you don't see your modem in the list of devices, try removing the USB cable and restarting your computer. Then re-attach the cable and let the Vodafone 3G Broadband Modem restart.
- If you can't make a data connection, make sure that your SIM is enabled for data connections. Contact Vodafone Customer Care if you're not sure.
- If you get an error message: **Error: you must be on the Vodafone network to make a connection**, please check that you are using a Vodafone SIM card. You can only use the Vodafone 3G Broadband Modem with Vodafone operators.
- For any other problems, first try the **Help** menu in the Vodafone 3G Broadband Modem main screen.
- Otherwise, please contact Vodafone Customer Care on 1850 287 000.

Modem status

Your modem will also show the signal status using the LED light on the front:

- **Green blinking:** a GPRS network has been found, and the modem is ready to connect.
- **Green solid:** connected to a GPRS network – data being sent and received.
- **Blue blinking:** a 3G network has been found, and the modem is ready to connect.
- **Blue solid:** connected to a 3G network.
- **Light blue solid:** connected to a 3G Broadband network.
